

New Route on Monte Monaco's North Face: Schoggijob

San Vito lo Capo, Sizilia

Character

After an easy 60m start pitch with some vegetation, the route gets overhanging or vertical for almost the whole length. Tufas, Pockets and Slopers in colourful rock are offering a very nice climb. The last two pitches are common with il volo di pegasus. There are several bolts in situ, but a rack of cams and nuts are necessary anyway.

Start

At an edge with a little red sling. 30m right of il volo di pegasus.

Descend

Abseil with 60m double rope

First Ascent

Silvan Schüpbach, Evelyn Weber and Damian Beck. 14. + 29.11.2012
